Mines and Mining Stocks

GROOM MINES GO FOR \$250,000

Famous Lead Properties in Southern "evada Pass Into Powerful Hands.

RAILROAD TO PROPERTY

STARTS BALL ROLLING FOR MANY CAMPS.

The famous Groom lead mines, in the Groom district, Lincoln county, Nevada, have been sold to a Goldfield and eastern syndicate, of which Charles B. Higginson a wealthy operator of Goldfield, is the moving spirit. The consideration is \$250 -000, ten per cent of which has been paid down, with the remainder to be paid in six and twelve months. The deal was closed in Pioche two or three days ago and T. J. Osborne, one of the chief owners of the famous old property, verified the report of the sale upon his arrival from camp yesterday. Mr. Osborne, together with William Wheatley of Pioche, and Patrick Sheehau, manager of the Lost Packer company's properties, were the chief owners of the ground, and Mr. Os-borne states that the deal was closed only after a searching, examination of the property by the engineers of the purchasing crowd. Their reports were so favorable that it required less than two hours to arrange details and close the bargain when the principals got together.

Location of Mines.

The Groom mines are located about 100 miles southwest of Pioche and ten miles from the Nye county line, about midway between the Pioche and Bullfrog countries. The ores are rated as the best lead-iron ores in the entire region and the product is one that commands a high premium at the smelters. In the early days it was possible to haul this ore to Pioche and even to Milford and market it at a good profit, notwithstanding the low price of lead. Now a fifty-mile haul will land it at Indian Springs or Ash Meadows on the Clark road, between Vegas and Bullfrog, and this is the way it will be taken out hereafter.

Plans of Purchasers.

Mr. Osborne states that it is the pur mines and building a branch railroad line from the most convenient point on the Vegas-Bullfrog route, and that the matter will be taken up right away. When this is done, Mr. Osborne believes the road will be extended to other camps in that region and that many of the old mines in the Tempahute. Freiberg and other regions will be brought rapidly to the front.

Entire Region to Boom.

Mr. Osborne has lived a great many years in Pioche, where he has practiced his profession as a lawyer, and where he has been for years connected with the Old Pioche Consolidated companies, now owned by the Nevada-Utah. For twelve years he published the Pioche Record and all the time has been more or less interested in the mines of the southern country. The Groom deal is one of the biggest he has pulled off on his individual account and he promises that he will quit account and he promises that he will quit the practice of law and hereafter give his entire attention to mining. He declares that Ploche is again on the map and he promises that it will occupy a more prominent position than it ever has done in the past, and he declares, also, that the region surrounding it for 160 miles, will make a noise that will be heard across the continent.

DIGGING OUT RICH SPECIMEN GOLD ORE

The leasers on the property of the Round Mountain Daisy Mining company are still taking out specimen ore at almost regular intervals, savs the Round Mountain (Nev.) Nugget. The Mulholland lease, which has been one of the heaviest and most consistent producers in the district, is showing up large bodies of ore. The Johnson lease is also working in good milling ore, with now and then a stringer of high values. Both of these leases are on the Daisy fraction.

But it is on the "Slim" Morgan lease on the Blue Jay No. 3 that the greatest quantities of specimen ore have been found of late. Some of the richest specimens yet exhibited in the camp have been on display at different places in town, and a number have been sent to Tonopah and Goldfield, where they are being shown.

The new company will begin active operations on the ground as soon as possible and proposes to sink a deep shaft. Under the direction of Superintendent Tom McSorley a force of men will be put to work. A power hoist will be installed on the property.

on the property.

With the new company in control of this ground the Round Mountain Daisy Mining company will not be long in taking its rightful place as one of the leading mines of southern Nevada. It is the intention of the company to put up a mill on the ground as soon as expedient.

DEVELOPMENTS IN MALACHITE SHOW WELL

The local offices are in receipt of a letter from Superintendent O. H. Sonne, of the Yerington-Malachite Copper company's properties at Yerington, in which, after disposing of matters of a business nature, he says:

"The development on the Malachite group is proving up the ground yers well."

"The development on the Malachite group is proving up the ground very well, and we have a full breast of ore in all of our drifts. While it does not run very high in cu., it is as high as what the other big mines claim for their average.

"The southwest drift is out of the barren lime, and has copper sulphides all through the face, and is improving with

The northwest drift is all in good ore, "The northwest drift is all in good ore, all sulphide, and certainly looks good.
"The northeast drift is not as good as the northwest, but is improving, and it will only be a matter of a few feet until it will hold its own with the others.
"Everybody looking over the Malachite thinks it will be a larger mine than the Manachy Vallay Spring property." Mason Valley-Spragg property.

MINING STOCK EXCHANGE. BUTTE & LONDON

Week Closes on a Market That Has Been Rather Soft and Draggy.

Trading on the mining exchange during the past week, and particularly for the last half of it, has been rather draggy and prices have been soft as compared with the previous several weeks. During the single regular and open board call yesterday a total of 33,250 shares.of stock, with a selling value of \$25,023, changed hands. The totals for the week were 316,-719 shares and \$217,576.57. When compared with the corresponding week a year ago, however, the record looks good. For the period mentioned 199,540 shares sold for \$137,100.50.

The market yesterday was utterly de-

STOCKS ON EXCHANGE

The jump of loc a share in Standard Coldfield Drisy
Copper of Bingham was the feature of trading in unlisted stocks yesterday. As a matter of fact, the raise ought to be marked up as 12½ cents, as the closing price on Friday was \$1.22½. Several thousands of shares changed hands at \$1.25 to \$1.35 and with buying orders apparently filled, the stock eased off to \$1.30, though little came out at that figure.

ure.
There was but little doing in other unlisted shares. Copper Glance did business at 28c to 29c, Western Nevada sold at \$1.52½ and Combination Fraction brought \$6.20. McDonald-Ely was quoted at \$1.15 to \$1.40. Bason Valley at \$3 asked Weimer Copper at \$1.75 and Salt Lake & Ely at 50c. Ely-Witch was at \$1.50 bid. \$1.75 asked and Ohio Copper at \$5.10 to 5.75.

Butte, Mont., Feb. 2. The Butte & London Copper Development company, the controlling interest of which is held by the Venture company of London, England, held its annual meeting of directors in this city yesterday afternoon, when Theodore Brantly, chief justice of Montana, was re-elected president; James H. Lynch, vice president, A. A. McMillan, treasurer, and W. E. Reynolds, secretary. Frederick W. Parks, of London, represents the interests of the Venture however, the record looks good. For the period mentioned 199,540 shares sold for \$137,100.50.

The market yesterday was utterly devoid of feature and the brokers in the pit looked as though they were glad the week was over, that they, as well as the stocks, might take a rest.

Following is the list of final quotations and record of sales made during the day:

BOOM IS ON FOR RHYOLITE CAMP

Mines Have Nearly \$100,000,-000 Worth of Ores Blocked Out and in Sight.

RAILROADS AND SMELTERS

MILLIONS FOR WATER AND RE-DUCTION WORKS.

With nearly \$100,000,000 of ore blocked out in the mines, with three railroads, with millions being spent in an elaborate water system at Ash Meadows Springs, designed to supply all the tributary camps in the northwest, a three-compartment affair 1,500 feet deep, on territory adjacent to the North Butte-company.

NEVADA MAGNATES ARE

SIZING UP ROSEBUD

That Senator George S. Nixon and George Wingfield, who have done so much in bringing Goldfield to the front, are 10t everlooking Rosebud, is attested by the fact that one of their prominent engineers is now at the camp for the purpose of looking it over, says the Humboldt Star. It is stated that the primary object of his visit is to inspect the Rabbit's Foot group, now under bond to L. L. Mushett of Toncean, who has had a force of miners at work for several weeks. The Babbit's Foot group ies between the Brown Palace and Dreamland and is one of the best located properties in the camp. Should such energetic operators as Nixon and Wingfield take it over it will be a big boost for Roselud.

Smelter for Ash Meadows.

Provo. Feb. 2.—Articles of incorporation of the Seven Troughs-Kindergarten company were filed with the county clerk today. The general financial office of the company is at! Provo. The capital stock is \$1,000,000 in shares of the parvalue of \$1 cach. and the directors and officers are: L. A. Friedman, president; J. William Knight, vice president; W. Lester Mangum. secretary and treasurer; L. Halbrook and Jacob Evans.

The company owns the following mining claims in Humboldt county. Nev.: Ivor. Tomy. Idris. Blewellyn, Idwall and Cyruso. on which work is now being done and rich gold ore being extracted. One hundred and fifty thousand shares of treasury is set apart to be disposed of by the directors. It is now being sold at \$80 cents a share.

Smelter for Ash Meadows.

"The Bullfrog district has the largest amount of gold ore blocked out of any district in the state of Nevada. To give an idea of the magnitude of the ore bodies there, I desire to relate the opinion of an expert of international reputation, who was sent into the district to examine the mines, in order to determine whether or not it would justify certain capitalists in building a large smelter at Ash Meadows springs, about forty miles souheast of Rhyolite.

"These capitalists purchased the Ash Meadows springs, for which they paid an enormous sum of money, and in order to be sure they would have sufficient ore to keep the smelter in operation, when it was completed, had a thorough examination made of the Bullfrog as well as other surrounding district.

Stocks in San Francisco.

James A. Pollock & Co., bankers and brokers, 6 West Second South street, furnish the following mining letter received from San Francisco over their private wire yesterday afternoon:

San Francisco, Feb. 2.—E. F. Hutton & Co. say: Trading was rather light again on the mining exchange, the principal trading being in Goldfield stocks, which appeared to be spotty. Brokers report the market as firm on the close, due to buying orders from Goldfield for Monday's opening, and a higher range is looked for consequently next week.

"As above stated, this expert is one of unquestionable reputation and he said:

"In the mines of the Bullfrog district there is over \$97,000,000 worth of ore blocked out, and only one-hundredth part of the mineral bearing territory has been touched."

"It is an undisputed fact that Builfrog has the largest bodies of low grade ore in the state and it is the consensus of opinion among the ablest mining men and experts that with depth the veins will concentrate into much richer ore.

"This as undisputed fact that Builfrog has the largest bodies of low grade ore in the state and it is the consensus of opinion among the ablest mining men and experts that with depth the veins will concentrate into much richer ore.

"This has already been demonstrated, as depth is attained. A few days ago in the Tramp Consolidated, at the deepest point, they struck ore going \$10,000 per ton in gold. We believe that the day is not far distant, when depth is attained in the mines surrounding Rhyolite, that instead of there being one Mohawk there will be a dozen, within a mile of the town.

Pocopah and Other Districts.

Pocopah and Other Districts.

"Surrounding this territory are the following districts: The Pocopah copper district, with enormous deposits of copper ore; the Johnny distrist, rich in gold; the Lee and Echo districts, sensationally rich in gold; the Greenwater Copper district, where the deposits of copper seem to be inexhaustible, carrying values far in excess of any others in the state. These districts all do their trading in Rhyolite "The Lee and Echo districts promise to surpass Goldfield and all others. Their veins are very large and can be traced for miles. They average from two feet to about 200 feet in width. The information is very peculiar, the vein being principally altered quartzite, similar to the veins in the Black Hills of South Dakota. While these veins have not been developed to any great depth, they carry sufficient values for operation on the surface and as depth is attained the values become sensational.

Rich Ores of Lee District.

Rich Ores of Lee District.

"As an example, on one of the properties known as the Hayseed and Stateline, in the Lee district, at a depth of twenty-five feet, three assays were taken from a rich streak of eighteen inches, with the ore in the vein six feet wide, and they got returns as follows: No. 1, \$8,600 per ton; No. 2, \$61,073 per, ton, and No. 3, \$123,600 per ton.

"We believe the Lee district will have a sensational boom within the next ninety

a sensational boom within the next ninety days and that the Salt Lake people are overlooking the greatest opportunity of their lives to secure mining properties in which many fortunes will be made in that district.

"The Ash Meadows Water company, mentioned above, is expending millions of dollars in building reservoirs and pipe lines to furnish water to the Lee and Echo and the Greenwater districts, and all other surrounding mining camps.

Seventeen Brokerage Firms. "As a further indication of what eing done in the Bullfrog district,

"As a further indication of what is being done in the Bullfrog district, in Rhyolite, six months ago, there were only four brokerage firms. Today there are the following firms: Rhyolite Mining & Brokerage Co., Taylor & Griffith, Dorr, McDonald & Co., Mann, Whittemere company, J. C. Houtz & Co., L. P. McGerry Brokerage company, J. J. Fagan Brokerage company, Wylee Rose & Co., Vaughan & Murphy, C. L. Cadogan company, Taylor & Vorhees, Fitzjerral & Tyson, Phillips Wilson company, Bevis & Co., Busch Brothers, Cushman company, Barnum & Frazier.

"These are all substantial concerns, transacting a good business. On almost every street in the town building is going on constantly and the appearance of the place changes every few days as the buildings are erected rapidly.

Rhyolite Will Surpass Goldfield. "I saw the boom in Goldfield and predict that the boom in Rhyolite will surpass Goldfineld within the next year, and the permanency of Rhyolite is assured from the enormous resources that it has to draw upon in the way of the great wealth that will come from the mines surrounding it. "The stock exchange of Rhyolite will open for business in about ten days, with

The stock exchange of Rhyolite will open for business in about ten days, with over 125 members. Some of the stock exchange seats were sold in New York, Philadelphia, Chicago, Denver, Salt Lake City, Butte, Spokane, San Francisce and Los Angeies. "These conditions and circumstances all bespeak a great future for the Bullfrog district and the town of Rhyolite."

Mining Notes.

The annual meeting of the Ingot com-pany will be held tomorrow afternoon at 2 o'clock. Seven cars of ore from Utah were re-leased from the Pioneer sampler yester-day morning.

P. C. Thompson will leave for New York again today on business the na-ture of which he would not disclose.

camp and that big doings will characterize the season's campaign.

Manager Thomas Weir of the Ajax has returned from an extended eastern trip, a trip that was taken with Mrs. Weir purely for recreation and rest.

purely for recreation and rest.

Samuel Newhouse is expected to reach home again next Wednesday evening, unless he decides to stop off a day in Colorado on his way back from Cobalt.

Manager P. J Donohue of the Talisman left for the south last night to see what had become of the hoisting machinery which was started for Milford from this city one week ago and which had not reached there yesterday.

James A Pollock & Co. yesterday com-

James A. Pollock & Co. yesterday completed arrangements which give them a direct private wire between Chicago and Boston. Heretofore messages to and from Boston through Chicago had to go by way of New York. The new arrangement makes the service between this city and Boston next to instantaneous.
